

Residential Knox Box Program

The Maynard Fire Department has a residential Knox Box Program for residents in Maynard. A Knox Box is a secure lock box that residents can purchase for their home. Once the Knox Box is installed, the fire department can come out and put a copy of your house keys in the Knox Box. The fire department is the only agency with access to this Knox Box, and it is keyed specifically for Maynard. We recommend a Knox Box for people with underlying medical issues that may prevent them from answering the door during a medical emergency. A residential Knox Box can be purchased through <https://www.knoxbox.com/>

We have a very limited number of residential Knox Boxes we can lease to residents. They would need to fill out the application and ensure the Knox Box would be returned when it is no longer needed. Since we do have a limited number of residential Knox Boxes, it is possible for all of them to be committed to residents when you inquire.
